

Student activities at I²IT

Campus Life

Situated amongst giant IT organizations, the students and faculty at I²IT relish their little paradise on campus. All of 12 acres, I²IT stands proud on lush green surroundings, accompanied by a perfectly designed infrastructure. The entirely Wi-Fi campus consists of fully air-conditioned lecture theaters, labs and state-of-the-art Convention Center.

The library holds well-stocked physical and digital references. There is a medical emergency and care center including a nursing center. It is also equipped with a sports ground, a jogging track, a hi-tech gymnasium, a convention hall for cultural activities, basketball courts, a cafeteria serving multi-ethnic cuisine and excellent residential facilities for students who enjoy a treat of the finest facilities and modern amenities.

In addition, the Balewadi Sports Complex, located within 2 km, from the campus is available to the students for their recreational needs. This international level sports complex has several sports facilities like Velodrome, squash courts, tennis courts, multiple olympic-size swimming pools, volleyball and basketball courts and facilities for indoor games.

Life skills development is an integral part of the curriculum. I²IT strives to develop the Spiritual Quotient,

Emotional Quotient and Intelligent Quotient of the students through a variety of activities.

Extra Curricular Activities

I²IT goes beyond academics. Here, we believe in developing personalities and not just intellectual geniuses. To bring about an all-round development in our students we lay strong emphasis on extra-curricular activities. These activities instill in the students values of leadership and team building.

At I²IT, students form their own leagues in organizing, planning and executing activities that bring about a sense of responsibility and allow them to practice their skills to face the industry professionally. Activities include seminars, debates, dramatics, sports and placements. I²IT conducts several workshops and events for IEEE, the International Organization of Engineers. It prides itself on being one of the largest groups of its kind in the city.

The Editorial Committee on the campus has taken the initiative in publishing an in-house magazine, Campus Buzz, that details the events taking place within I²IT. Dhruva is a journal, compiled and published by students and faculty, with articles from scientists and technologists from across the globe. Not limiting themselves to just IT on their minds, students at I²IT have formed a Hitch-Hikers Club that

organizes rock-climbing expeditions and hikes around the city.

I²IT also has the distinction of forming the first Toast Masters Club in Pune. It provides an opportunity to the students to develop their public speaking skills.

Recently, I²IT's Center for Performing Arts hosted artistes from Russia. Organized by the students, it was a classical music extravaganza relished by Pune's society. The Student Committees also organize the annual inter-collegiate Tech and Management event "Dhruva". With colleges participating from across the country, Dhruva comprises of real-world based technology and management competitions that test knowledge and skills.

To encourage overseas interaction and also to inculcate in the students a keen sense of culture, the I²IT's Center for Performing Arts time and again coordinates exclusive performances by well acclaimed artists from the world over. The Piano concert by two internationally acclaimed musicians; Mrs. Francine Astani from Tihiran, and Mr. Philip Fanise from France was a musical affair well remembered by all. 2007 will see an exclusive theatre performance of Hirsoshima ki Kahani by students of Tokyo University of Foreign Studies to be performed in Hindustani (Hindi-Urdu).

I²IT Student Residencies

Excellent Facilities and a healthy campus life make learning at I²IT a unique experience.
